Kindergarten math

Adding within 5

Beginner pack

Count two groups, put them together, and write the total. Then write the number sentence, and listen to a tiny story.

Before you start

Start here if your child can count objects up to 5.

Inside this pack

- 18 practice pages
- An answer key for every practice page
- A parent guide
- A progress tracker
- A certificate of completion

US Letter · print in black and white · about 10 minutes a day

Parent guide

How to use this pack

Print one practice page at a time. Plan on about 10 minutes. Stop while your child is still willing to sit. One page is a full day. Do the pages in order, from practice page 1 through practice page 18. Each practice page has an answer key at the back of this file, with the same page number. You can leave the keys on a screen instead of printing them.

I do, we do, you do

Problem 1 on each practice page is marked I do. Solve it out loud while your child watches. Problem 2 is marked We do. Solve it together. Your child does the rest. If the rest falls apart, stay on we do for one more problem. That is a useful step, not a failed page.

Counters, then pictures, then numbers

Practice pages 1 and 2 ask your child to count one group. Practice pages 3 and 4 ask for two groups, still without adding. An empty bowl on practice page 4 means 0. If the printed pictures are hard to track, set cereal or coins on top of them and count those. Practice pages 5 to 8 ask for the total. Practice pages 9 to 13 connect the pictures to a number sentence. The totals step back on practice page 9 because the sentence is new. Practice pages 14 to 17 are tiny stories for you to read aloud. Your child does not have to read the story. Practice page 18 reviews the sentences.

Parent guide

What to say if your child gets stuck

On practice pages 1 to 4, say Touch each object as you count. On practice pages 5 to 8, say Count this group. Count the other group. Now count every object. On practice pages 9 to 13, point to the plus sign and say Plus means we put the groups together. On practice pages 14 to 17, ask What happened in the story before you ask How many now. If practice page 18 is shaky, go back to practice page 10 for another day.

When to move to the next pack

Stay with this pack if you are helping with most of the problems on practice pages 12 to 18. Move to Adding within 10 when practice pages 16, 17, and 18 are correct with only a little help, including the stories. If practice page 1 is hard, spend a few days counting real objects up to 5, then start this pack again.

What you need

A printer, US Letter paper, and a pencil. Counters such as cereal or coins are optional. The pages are made to print in black and white.
